

Calculus BC - Summer Assignment - Part 1

The summer assignment will be in two parts.

The first set of instructions is below. You should complete this assignment by **July 21**. I will send you an email with the next assignment around the same time so that you can begin working on it. If you need to contact me, my email address is: cherrington@gracechristian.net.

I will also be creating Facebook groups so that we can communicate over the summer. Look for an invitation soon.

Assignment Instructions

- 1) Create an account with Khan Academy (khanacademy.org). If you already have a google or Facebook account, you can use that account as your Khan Academy account. Just click on Login at the top of the page.
- 2) Click on the large word "Practice" (written in blue) at the top of the Khan Academy web site.
- 3) Register with me as your coach. At the very bottom of the page in small letters along the bottom bar, there is a choice for "Add a Coach" (My coach ID is cherrington@gracechristian.net). As long as I am your coach, I can see all your activity on the practice exercises.
- 4) You will see a 'map' of math exercises. Navigate down to the bottom of the 'map' to find the practice star for "Limits 1". Work through these exercises until you get a 'streak' of 10. You can see your current 'streak' at the top right of the screen. If you need help, scroll down to find the "I need a hint" button or to find related videos that you can watch.
- 5) Go back to the 'map' and go a little further down to find the practice star for "Limits 2" Work through these exercises until you get another 'streak' of 10.
