GRACE Christian School Acceleration Policy for Middle and High School Mathematics Revised September 2016

The mathematics curriculum at GRACE prepares all students for admission into four-year colleges and universities. All students need four math courses at the high school level. GRACE now offers several options for students who wish to accelerate their academic progression in middle and high school. Students who are entering into a science department major in college should take Calculus during their high school career.

1) Students progressing from 5th to 6th grade will be selected for placement in a regular track or accelerated track based on all of the following:

- 1) Final grade in math class
- 2) Terra Nova math scores
- 3) Pre-Algebra readiness test
- 4) Teacher recommendation

2) After the completion of sixth grade, rising seventh grade students and beyond may take an accredited, online class (approved by the school) over the summer to accelerate to the next level of math for the upcoming school year.

3) Any student, in Pre-Algebra or above, may choose to accelerate by taking a course over the summer.

4) Students may take two math classes in one year if the courses fit in their schedules - this works best with Algebra I and Geometry or Geometry and Algebra II. Certain electives or classes may be bumped to another year to enable students to accelerate, ex. PE.

5) Transfer students who have taken a course already, may test out of the math level by taking the semester and final exams and achieving an A or B on these tests.

See math sequencing below:

	Regular	Accelerated	Double Accelerated
6th	Math 6	Pre-Algebra	
7th	Pre-Algebra	Algebra I	(online class)
8th	Algebra I	Geometry	(online class)
9th	Geometry	Algebra II	(online class))
10th	Algebra II	Pre-Calculus Adv Functions/Modeling Discrete Math	(online class) AP Statistics
11th	Pre-Calculus Adv Functions/Modeling Discrete Math	AP Calculus AB AP Statistics Discrete Math	Pre-Calculus AP Calculus AB
12th	Pre-Calculus AP Calculus AB AP Statistics Discrete Math	AP Calculus BC
